**Blankenship Contracting, LLC has an exciting new service to offer,**

## **GROUND PENETRATING RADAR (GPR)**

**With the GPR, we can quickly identify and mark the location and depth of service utilities - gas, communications, sewer lines - and other metallic and non-metallic targets including underground storage tanks.**

**This service will dramatically reduce the time spent locating utilities, as well as other uses such as utility mapping, as-built verifications, finding voids, locating service connections, septic tanks and even unmarked graves.**
